ABOUT THE SPECIALIZED PHILIPPINE ENTERPRISE REFERENCE OF EXPERTS AND SCIENTISTS (SPHERES)

The Division of Documentation of the National Institute of Science and Technology published the first volume of the Philippine Men of Science in 1964. It contained one hundred one bio-bibliographies of living men and women in the field of science and technology. It keeps track of our scientists and their contributions for the information and benefit of all. The compilation aims to provide interested users a useful and effective reference.

In 2012, the 24th volume of the Philippine Men of Science was uploaded online to make it more visible and accessible to users. Subsequently, the publication was renamed as the Philippine Men and Women of Science in 2013 to adopt a gender-sensitive title.

Today, the publication is given a new name – Specialized Philippine Enterprise Reference of Experts and Scientists (SPHERES).

The SPHERES brand introduces a new function with a new focus. When it comes to Filipino scientists and experts and their bio-bibliographic information, this compilation serves as a specialized reference for the public. Now with a gender-neutral emphasis and an inclusive sphere of influence, SPHERES is the name to remember.

Each volume of SPHERES consists of two issues annually.

Name Anabella Tilano Bautista-Tulin

Sex Female

Organizational Affiliations

Professor VI, PhilRootcrops, Visayas State University, Baybay City, Leyte

Education

Doctor of Philosophy in Soil Science, Iwate University, Morioka, Iwate, Japan 1997

Fields of Specialization

Soil Chemistry

Soil Science

Association Membership

Member, National Research Council of the Philippines (NRCP)

Researches

Completed

Integrated soil and crop nutrient management in vegetable crops in Southern Philippines

Protected Cropping for Profitable Vegetable Production in the Southern Philippines

Enhancing Cabbage Production in P deficient soil through Integrated Nutrient Management

Indigenous knowledge on natural resource management of people living in the marginal upland s of Eastern Visayas. (under the PHernet Project on Soil and Environmental Quality Enhancement in Climate Change

Microbial -induced mobilization of micronutrient from different soil environments for increased yield and improved nutritional quality of sweet potato and purple yam
